

AN IMPORTANT MESSAGE

REGARDING THE RELEASE OF ELECTRIC CUSTOMER INFORMATION

In order to expand the range of competitive energy options available to consumers in Massachusetts, the Department of Public Utilities has established guidelines that require each electric distribution company to compile a customer information list and make it available to competitive energy suppliers.

The list includes your name, mailing and service address, monthly meter read date and rate class. Also included is your monthly kilowatt-hour usage (and demand where applicable) for the previous twelve months. We update the list quarterly and it is to be used by competitive energy suppliers for marketing.

Continued on reverse.
